

Tawn Dang

ICT 420

JSON-LD Justification:

For this assignment, I was able to find the exact schema type, ArtGallery, for my page. This allowed me to choose from properties that closely describes the site, and especially, the page that I chose. I included necessary attributes like the address of the business and contact information. These are information that would be useful to have included in a Google search query. I also included hours of operation, which is a key detail for a local business.

This assignment helped me address mistakes that I made in the past with JSON-LD and I can write them much more accurately now. It was also interesting to see how much my site has changed throughout the course of this semester. The improvements shown on the final edition of my site is a testament to what I have learned in Semantic Web Development.
